

Vanquish Mac OSX Application Installation Guide

Once you have the Vanquish Mac Software .zip file on you Mac follow the instructions below to use the software.

- 1) Access the files in the Vanquish Mac Software .zip file by double clicking on the file.
- 2) Begin the FTDI USB Serial port driver installation by double clicking the file named FTDUSBSerialDriver_v2_2_18.dmg.
- 3) Choose the installation package that corresponds to the Mac OSX version you have. If you are using Mac OSX 10.3 or earlier use the file named FTDIUSBSerialDriver_10_3. If you are using Mac OSX version 10.4 or higher use the file named FTDIUSBSerialDriver_10_4_10_5_10_6_10_7.

Note: If you don't know what Mac OSX version you have click the apple icon in the top left corner of your screen and choose "About This Mac"

- 4) At this point the Vanquish USB Tool and the Vanquish Boot Screen Editor may be used. Double click the .dmg files the click the application icon to start either application.
- 5) Optionally you may drag and drop the application icons into any directory of your choice so that the .dmg files do not have to be used any more.
